Subject: New BaP study- preterm birth
Attachments: Bap-new study-Laknaur 2016-PTB.docx; Laknaur 2016.pdf

Hi Vince, in our recently conducted literature search update post peer review, we have identified a potentially compelling in vivo animal study. I have attached the study, as well as a few pages summarizing the study findings and additional context for the reproductive endpoint of preterm birth and its connection to uterine inflammation.

Can you advise us on a reasonable course of action?
